PROFESSIONAL EXPERIENCE

Mid QA Automation Engineer   03. 2022 – present
AirNauts | Warsaw, Poland

- **Performed**: Functional (Integration, Regression, Smoke, Exploratory), Non-functional (Performance) and **Automated Testing** for Web and mobile projects.
- Utilized **Jira** for efficient bug tracking, reporting, and resolution, ensuring seamless project progress.
- Created and maintained detailed **test documentation** in **Confluence**.
- **Led team** of junior testers, coordinating testing on a project.
- Managed Git workflows, pull requests, and merges for collaborative coding.
- Utilized **GitHub Actions** to automate **CI/CD** pipelines, ensuring efficient software delivery.
- Communicated with clients for feedback, updates, and to ensure project alignment and satisfaction.
- Proficiently **utilized Test Management Software** (e.g., Testmo, Testrail) to organize test cases, track testing progress, and streamline team collaboration.
- **Automated backend tests** using Postman for efficient query/mutation execution.
- Used API platform (**Postman / Altair**) ensuring data integrity, response accuracy, and efficient backend performance.
- Managed code collaboration through **Git**, utilizing techniques like **branching**, **merging**, and **pull-requests** to ensure organized version control and effective code integration.

  - **Technical Stack:**
    - **Languages:**   JavaScript / Typescript
    - **Version Control Tool:**   GitHub
    - **CI/CD:**   GitHub Actions
    - **API Testing:**   Postman
    - **Database:**   postgreSQL
    - **Project Management:**   Jira / Asana
    - **Testing Management:**   Testrail / Testmo
    - **Proxy:**   Proxyman
    - **IDE:**   Visual Code Studio
    - **Debugging tools:**   Chrome Developer Tools
    - **Automation Framework:**   Playwright
    - **Methodologies:**   Agile / Scrum / Lean
    - **Performance Testing:**   K6

Junior QA Manual Tester   01. 2021 – 03. 2022
LionBridge | Warsaw, Poland
